THE BUSINESS OF FASHION

2019 INTERNSHIP
SOFTWARE ENGINEERING

Nordstrom's Software Engineering Internship will give you an opportunity to work on technology that will delight our employees and customers.

DURING YOUR INTERNSHIP YOU'LL...

• Get hands-on experience with real-world projects, working alongside our engineers. As part of an agile development team, you'll get experience with coding, troubleshooting and automation on diverse projects and get exposed to web technology, cloud technology, security, mobile apps and infrastructure automation.

• Be mentored and supported by experienced members of our Technology team.

We're seeking curious, innovative computer science and software engineering students to help us create amazing customer experiences. Our goal is to provide a fun and engaging learning experience for our interns while preparing you for entry-level positions within our Technology teams.

NOW, THE FINE PRINT

This is a paid internship that's open to college students who are currently pursuing a technology-focused degree from an accredited institution. You must have experience with object oriented coding (C#, C++, Java, Python, etc.) and be able to commit to a full-time schedule during the 10-week program, which takes place in Seattle, WA, from June to August.

We'll begin accepting applications in late September at **careers.nordstrom.com**.

Nordstrom is an equal opportunity employer committed to providing a diverse environment.
